

## BUCKETS

---

### Digging Buckets

Harford's reputation was built on the range of digging buckets which deliver optimum performance with minimum stress to plant. Options include weld-in pins and removable blades

### Hook Buckets

Reduce time and effort when moving around the job site

### Two-Way Grading Buckets

Easily de-coupled and turned 90 degrees, so you save time – the bucket turns, not the machine! Designed specifically to enhance the performance of our unique Uni-Lok Tilt®, the 4-pin design offers greater flexibility in complex applications.

## HIGH-QUALITY, SPECIALTY EXCAVATOR BUCKETS

### BUCKETS

---

#### Ditching Buckets

Tough enough for the most demanding ditching and grading jobs. With built-in stiffeners for strength and durability. Removable blade option

#### Safelock Buckets

Made specifically for the Harford Safelock® Dedicated Quickhitch System to maximize breakout force and prevent interference with the machine

#### Tilting Ditching Buckets

The hydraulic tilting mechanism transforms the performance of the bucket, allowing it to be held at the exact angle required anywhere through 45 degrees. Supplied with standard fittings compatible with your machine's hydraulic system

# HIGH-QUALITY, SPECIALTY EXCAVATOR BUCKETS

## SPECIALTY BUCKETS & ADAPTORS

### Ripper Tooth

Made with wear-resistant steel for maximum strength. Ideal for breaking up hard surfaces, dislodging rocks from topsoil, pulling up tree roots and wrecking. Removable tips are standard.

### Brush Rake

For fast, efficient scrub clearance and topsoil preparation, the Brush Rake efficiently removes debris, stick and weeds.

### Stone Bucket

Perfect for recycling and landscaping applications, separating rocks and large objects from soil. Tine spacing can vary to your specs!

### Clay Hook Bucket

Designed specifically to reduce resistance of removed material, allowing it to be unloaded more easily

### Cable Bucket

Ideal tool for digging deep, with minimal backfilling

## SPECIALTY BUCKETS & ADAPTORS

### Scandi-Style Grading Bucket

Reinforced side plates for strength and durability plus a sleek side profile make this bucket move more swiftly through the ground and release material quicker than a conventional grading bucket. Combine it with a Harford Tilt Coupler for a perfect landscaping system or road grading – whatever needs fine grading at all angles and tilt up to 90 degrees left or right. Available for up to 9 tons for standard pick-up of Harford Safelock® System.

### Scandi-Style Grading Bucket with Tilt Option

If you choose not to invest in the Harford Tilt Coupler and a 90-degree tilt is not as important as having some tilt, then we offer the more economical Scandi-Grading bucket with its own tilt unction which allows for 45-dgree tilt, left and right.

### Square Hole Bucket

A special style Safelock Bucket with a square hole for specific excavation projects.

### Uni-lok® Tilt Rake

Utilize the Uni-Lok®, double-locking, hydraulic quick hitch solution with the rake attachment and gain the ability to tilt the rake with ease to get your project done quickly and efficiently.

HIGH-QUALITY, SPECIALTY  
EXCAVATOR BUCKETS

## SPECIALTY BUCKETS & ADAPTORS

**Trapezoidal V-Bucket**  
Perfect for forming new ditches and trenches or opening badly blocked ones. Large capacity and narrow cutting edges give excellent ground penetration

**Reed Bucket**  
Allows water to be drained back into the ditch or channel but retains weeds and solid waste

**Land Clearing Rake**  
With thicker tines and wider spacing, the Land Clearing Rake is built to handle the extra power needed for heavy-duty jobs such as removing tree roots

**Klacc System**  
All our buckets and attachments can be made to suit the Klacc Quickhitch system

**Hammer Adaptor**  
Tailor made to suit any combination of machine and hammer

**Safelock Universal Mounting Plate**  
Made specifically for the Harford Safelock® Dedicated Quickhitch System to allow easy pickup of any attachments
