

# HIGH-QUALITY QUICK COUPLERS

## MECHANICAL COUPLERS

The world renowned Safelock® Quick-Hitch System is the ultimate in safety, simplicity, durability, and technical excellence! Designed for excavators in the 0.75 to 9 metric ton range (1,650 – 20,000 lbs.) This quick coupler saves you money by dramatically reducing bucket changeover times. Designed for Safelock® Buckets by Harford Attachments only.

Another fantastic innovation from Harford Attachments, the Pro-lok® Coupler is designed as a universal coupler to fit most attachments from various manufacturers. Rated as best in class, as a manual quick coupler, the Pro-lok® features a unique double-locking technology, automatic wear compensation as well as a visible safety indicator. Designed for excavators in the 0.75 to 9 metric ton range (1,650 – 20,000 lbs.)

Solesbee's Attachments and quick couplers carry a great reputation. Their mechanical couplers fit any excavator starting at 0.5 metric tons (1,100 lbs.) Please inquire for further info.
